

Stations (oceanObs)

Table of contents:

- [Table of contents:](#)
- [Endpoint](#)
- [Historical availability](#)
- [Tide Gauges](#)

Endpoint

It is possible to get the station list through the oceanObs service by calling the station endpoint. See [API documentation](#) for endpoint.

Historical availability

The oceanObs service provides data from 1889. However measurements are not available for all stations as far back as 1889. [Click here](#) for page displaying the historical availability for each parameter at each station. The noted year is the first year with observations for the given parameter and station.

Tide Gauges

The tide gauge stations around Denmark measure the water level and at some stations the water temperature as well.

A list of the stations available through the oceanObs service is listed below (last updated February 3rd 2021).

The station list represents both present and historical data about a station - see [Station Lists Explained](#).
